## SMALL OFFICE SECURITY

Proactive security and management

BitDefender Small Office Security is a robust and easy to use business security and management solution, which delivers superior proactive protection from viruses, spyware, rootkits, spam, phishing and other malware.

BitDefender Small Office Security enhances business productivity and reduces management and malware-related costs by enabling the centralized administration, protection\* and control of workstations and of the file traffic inside companies' networks.

### KEY FEATURES

- Automation of routine management activities and event response\*\* through security policies
- Supports the centralized management of workstations and file servers
- Antivirus, antispyware, antirootkit, firewall, antispam, antiphishing, privacy and user control for workstations and file servers\*
- Automatic detection and deployment on new workstations
- Proactive heuristic protection against zero-day threats
- Centralized and detailed reports
- Extensive WMI script support

### KEY BENEFITS

- Reduced administration workload and costs
- Increased security for corporate computer users
- Safe sharing of files and documents
- Improved network visibility
- Increased usability
- Optimized for business environments

Features	BitDefender Small Office Security Components		
	Client Security	Security for File Servers	Security for Samba

Firewall	/		
Antispam & Antiphishing	/		
User Control & Local backup	/		
Centralized Management	/	/	/
Platform	Windows	Windows	Linux, FreeBSD

\* To find out more about protection types and centralized management at workstation/server level please refer to the table above  
 \*\* Available in spring 2008

### BitDefender Technologies

**b-have** All BitDefender solutions include B-HAVE, a patent pending technology which analyzes the behavior of potentially malicious codes inside a virtual computer, eliminating false positives and significantly increasing detection rates for new and unknown malware.

**NEUNET** To better deal with new spam, the BitDefender Lab has created NeuNet, a powerful antispam filter. Inside the Antispam Lab, NeuNet is pretrained on a series of spam messages so that it learns to recognize new spam by perceiving its similarities with the messages it has already examined.

**Certified Antivirus Engines** BitDefender's award-winning scan engines featuring the B-HAVE technology have been recognized by leading certification bodies, including ICSA Labs, Virus Bulletin, West Coast Labs, for their unmatched proactive antimalware protection.
