SECURITY FOR SHAREPOINT

The Right Security Solution for your SharePoint Server

BitDefender Security for SharePoint provides antivirus and antispysware protection for your Microsoft SharePoint Server. BitDefender Security for SharePoint scans files uploaded into and downloaded from document libraries and lists, in real-time, with excellent cleanup rates and an option to quarantine infected files. This solution allows safe team collaboration inside business networks, while preventing infected files from compromising the confidentiality of business activities.

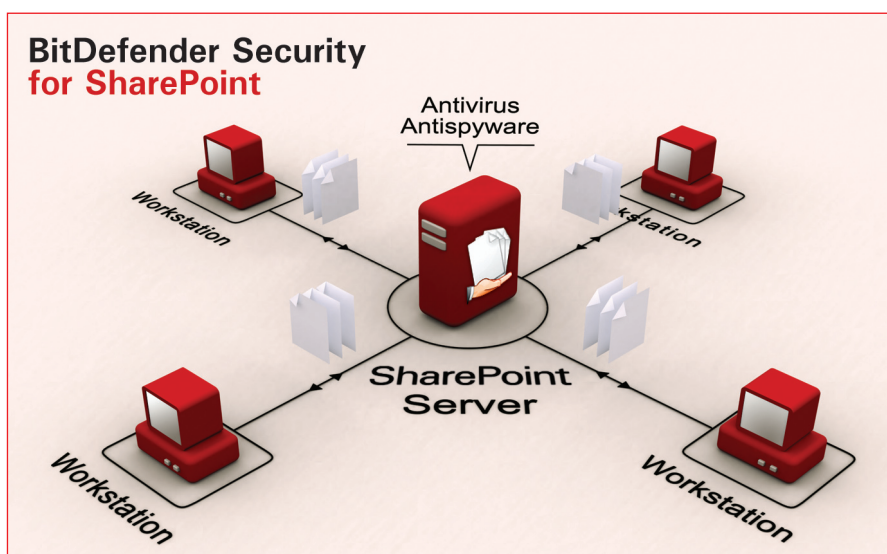

KEY BENEFITS

Safe Sharing of Information and Team Collaboration

- Scans file traffic ensuring real-time antimalware protection and outbreak prevention
- Allows you to schedule on-demand antivirus scans or perform scan-now actions for enhanced safety
- Secures infected or suspected files in a quarantine area where you can deal with them at will

Increased Productivity

- Scans and fingerprints “read-only” files just once during the same session and only re-scans them if there is a new session, an update or an infection in the system.
- Provides lightning-fast, secure collaboration, thanks to its advanced and tight integration with Microsoft Virus Scanning API
- Provides a configurable scheduler for on-demand antivirus scans and update tasks
- Notifies you about the performance of scan and update tasks through its efficient alerts module

KEY FEATURES

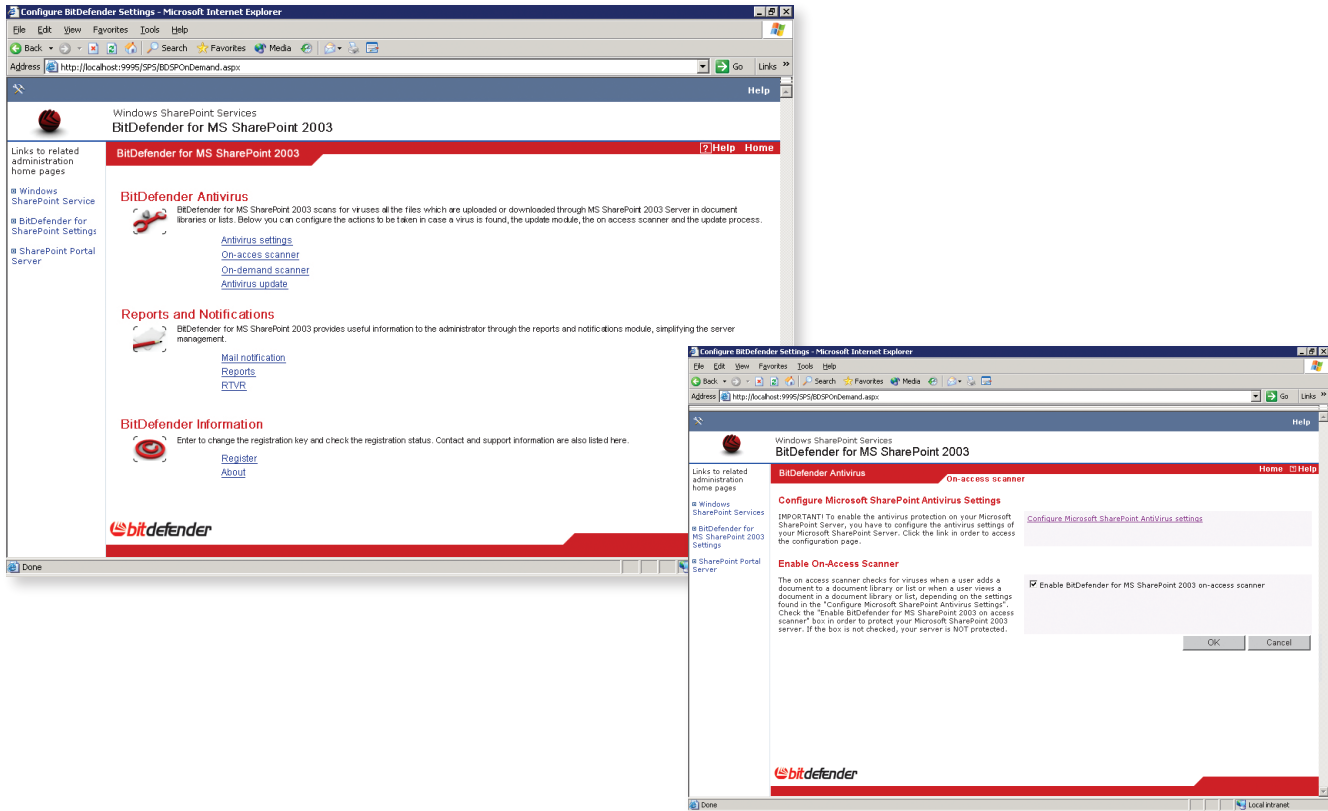

- **Superior antivirus and antispysware protection**
- **Proactive heuristic protection against zero-day threats**
- **Tight integration with Microsoft Virus Scanning API to optimize and accelerate the scanning process**
- **Real-time and on-demand scanner for permanent file protection**
- **Comprehensive reporting on scanned files and alerts**

BitDefender Technologies

b-have All BitDefender solutions include B-HAVE, a patent-pending technology which analyzes the behavior of potentially malicious codes inside a virtual computer, eliminating false positives and significantly increasing detection rates for new and unknown malware.

Certified Antivirus Engines

BitDefender's award-winning scan engines featuring the B-HAVE technology have been recognized by leading certification bodies, including ICSA Labs, Virus Bulletin, West Coast Labs, for their unmatched proactive anti-malware protection.

KEY BENEFITS

Increased Usability

- Delivers elegant management functionality and allows fast access to the most common settings due to its friendly and intuitive MMC-based interface
- Provides activity reports through its robust monitoring system and statistics module
- Offers customizable alerts for several event types: antivirus signature updates, product updates, on-demand scans and viruses detected

System Requirements

- Microsoft SharePoint Portal Server 2003
- Microsoft Windows SharePoint Services

Operating Platform

- Microsoft Windows Server 2003 Standard Edition
- Windows Server 2003 Enterprise
- Windows Server 2003 Datacenter
- Windows Server 2003 Web Edition; Internet Explorer 6.0
