Security Awareness

COURSE DESCRIPTION:

Today, in the information century, information exchange drives the businesses. All of us are using each day computer networks to work, share data, talk to each other and have fun. We are constantly sharing information, anytime and with people from all over the world and this is done very easily. But, are we ever thinking what will happen if the information is intercepted? Especially within the organization environment, confidential information must always be protected but unfortunately we cannot always count on the IT department colleagues. It is our duty to contribute to maintain our organization infrastructure secure. Understanding our role and responsibilities, our main goal should be to conserve our organization's integrity, by understanding and respecting security rules.

APPENDIX

- Life today
