

# BitDefender SBS Standard Security

Protect your business from malware threats

BitDefender SBS Standard Security secures business servers (file, Exchange and SharePoint) and workstations against the sophisticated threats of newly emerging malware and against attempts to steal confidential and valuable data.

This set of integrated security solutions is designed to protect the users of MS Small Business Servers Standard Edition and helps them comply with data security regulations without putting a strain on their limited IT budgets and human resources.

## Key benefits:

- Low administrator workload and administration costs;
- Increased productivity;
- Integrated security for corporate computer users;
- Safe sharing of information and team collaboration;
- Reduced mail traffic;
- E-mail protection against a wide range of malware;
- Ease of use and management;
- High stability;
- Low resource/network impact;
- Free 24/7 technical support.

## Key features:

- Antivirus, firewall, antispam and antispyware protection for corporate computer users;
- Support for WMI administration tasks and Windows update management;
- Centralized management support for all BitDefender products on Windows platforms;
- Proactive heuristic protection against zero-day threats;
- Superior antivirus protection for file servers;
- Multiple layers of antispam filters;
- Hourly antivirus signatures updates.

## BitDefender advanced technologies:

All BitDefender products include B-HAVE, a patent pending technology which analyzes the behavior of potentially malicious codes, inside a virtual computer, eliminating false positives and significantly increasing detection rates for new and unknown malware.

### Image Spam Filter

BitDefender offers a more accurate image filter which, instead of analyzing the text within image spam messages, learns the common characteristics of those images in point of color content and proportions. The result: less false positives and lower spam traffic.

To better deal with new spam, the BitDefender Lab has created NeuNet, a powerful antispam filter. Inside the Antispam Lab, NeuNet is pre-trained on a series of spam messages so that it learns to recognize new spam by perceiving its similarities with the messages it has already examined.

### Certified Antivirus Engines

BitDefender's award winning scan engines featuring the B-HAVE technology have been recognized to provide the most proactive antivirus protection available by ICSA Labs, Virus Bulletin and Checkmark.

## BitDefender SBS Standard Security includes the following

### BitDefender Client Security

BitDefender Client Security integrates BitDefender Enterprise Manager and BitDefender Professional Plus Client into one seamless security solution.

**BitDefender Enterprise Manager** enables the full automation of routine tasks and it allows the administrator to safely manage clients and tasks from anywhere in the network.

**BitDefender Professional Plus Client** integrates antivirus, firewall, antispam and antispyware modules into one comprehensive workstation security package.

### BitDefender Security for File Servers

BitDefender Security for File Servers protects Windows-based file servers, minimizing administration efforts. Reliable and easy to use, it targets both small and large organizations.

### BitDefender Security for Exchange

BitDefender Security for Exchange provides antivirus, antispyware, antispam, antiphishing, content and attachment filtering engines seamlessly integrated with the MS Exchange Servers, creating a completely clean Exchange environment.

### BitDefender Security for SharePoint

BitDefender Security for SharePoint provides antivirus protection for your SharePoint Server. BitDefender Security for SharePoint scans the files uploaded and downloaded in document libraries and lists, in real-time, with excellent cleanup rates and an option to quarantine infected files.

## Services

### Hourly Updates

Virus definitions are automatically updated 24 times a day without user intervention, directly from the BitDefender servers or from approved mirror sites, ensuring a swift and effective reaction.

### Upgrades

Registered users benefit from free upgrades to any new version of the product during the license period. Special price offers are also available to returning customers.

### Free 24/7 Professional Technical Support

Certified representatives provide BitDefender business customers with free permanent support online, by telephone or e-mail. This is supplemented by an online database with answers to Frequently Asked Questions and fixes for common issues.
