Fight back with the software used by millions. BitDefender starts working and keeps working—around-the-clock and around the globe, continuously protecting your privacy and defending your digital world.

Why BitDefender?

- ✓ Award-Winning, and Internationally Certified Products
- ✓ Trusted by Tens of Millions of Customers, Worldwide
- ✓ Around-the-Clock Technical Support
- ✓ 30 Day Money-Back Guarantee

Stop Attacks on your Personal Data

With improved detection features like *Quick Scan*, BitDefender shuts down viruses, spyware, hackers and other threats. You can eliminate unwanted junk mail and encrypt your personal information so it never leaks over email, social media networks, IM, or websites that track your online activities. Start shopping, banking, and downloading online with absolute confidence.

Secure Family Data from Theft or Corruption.

BitDefender extends protection to Internet-connected families with unique *Parental Controls* that let you review and restrict your kids' use of the web, games, or any other applications. You can even use remote controls at work to monitor the online activity over your home network and schedule specific times when access to the Internet is allowed.

Stylize to Match Your Needs

Match the interface to your level of comfort by selecting between *Basic*, *Intermediate*, or *Expert* settings—and quickly create shortcuts to frequently used controls.

PROTECTION JUST GOT PERSONAL

At BitDefender we don't like one size fits all software. We believe the software should adapt to you.

.Net framework 2.0

Stop Viruses and Spyware Cold

Proactive protection stops new viruses and malware that other products miss.

Safeguard Your Privacy

Eliminate the chances your data and conversations are leaked to others over email, social media networks, IM, or websites that track your online activities.

Keep Intruders Out

Establish a two-way firewall with just a few clicks, to continuously monitor your Internet connections and prevent unauthorized access—even over a Wi-Fi network.

Eliminate Spam

Send unwanted or corrupted email and attachments straight to the trash, so they never reach your Inbox.

Manage Your Home Network

Control the security of your entire network from a single location.

Keep Your Family Safe

Block inappropriate content or restrict the times your kids can access the web with a few clicks, then receive reports via browser, email, or cell phone, on recent websites and activity for each child.

Play and Work Seamlessly

Automatically activate *Game*, *Laptop*, or *Silent Mode* to minimize interruptions, prolong battery life, or reduce system load to ensure seamless and secure gameplay.
