

Bitdefender[®] ANTIVIRUS FOR Mac

Antivirus & Antiphishing Protection

Macs are traditionally believed to be less prone to cyber-criminal attacks. Not invulnerable. Keep your Mac safe and make sure you don't pass Windows viruses (which don't affect Macs) to your family, friends and colleagues.

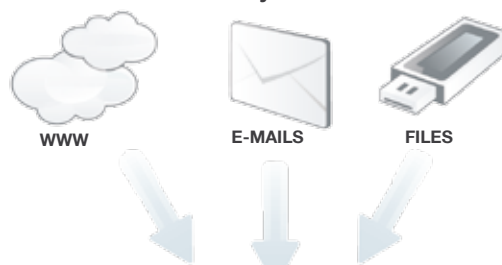

Key Features:

- Protects your valuable files and documents from Mac viruses
- Blocks webpages that attempt to steal your credit card data
- Prevents you from passing viruses along to your friends' PCs
- Uses minimal system resources – won't slow you down

Stop viruses from being passed from Macs to PCs!

Windows targeted viruses can come from almost anywhere
