Bitdefender MOBILE SECURITY FOR ANDROID

Why Bitdefender?

- Award-winning, corporate-strength security for the home
- Technology trusted by 400+ million PC users worldwide

That's four great products in one! Install now to get the newly upgraded features:

MALWARE SCANNER (FREE) NEW

Automatically scans apps as you install them to prevent unpleasant surprises. It works in the cloud so you're always running the latest checks. You can also trigger it manually. It works against latest malware threats and aggressive adware.

APPLICATION AUDIT (FREE)

Some apps peek into your private data and they needn't, or access the internet and they shouldn't. The Application Audit helps you ensure that your apps don't misbehave.

WEB SECURITY (PAID)

Keeps you safe from malicious sites and their traps, stopping you from the get-go.

ANTI-THEFT (PAID) NEW

Did you misplace your phone? Was it just stolen? Jump online to <http://my.bitdefender.com> or pick up your friend's phone and remotely lock it. Make it sound an alarm. Send it a message. Or wipe it, so your sensitive data doesn't fall in the wrong hands. You also get to hear what's around the stolen phone, SIM change alerts and password protection.

Mobile Security and Antivirus makes sure your phone is secure and your privacy protected. The application, which taps Bitdefender's decade of award winning experience fighting electronic threats, offers a robust defense against invasion of privacy, viruses and theft while saving battery power for its core purpose – communication.

Mobile – All you need is the device in your pocket. No more borrowing chargers during one-bar battery alarms. No more scouting for available wall sockets when you're on the move. We leave your battery for your communication.

Security – Bitdefender's award-winning technology ensures the safety of 400 million users worldwide. We extend this safety net to your phone with cloud-based technology remotely updated 24 hours a day. Bitdefender Mobile Security blocks even the latest malware, spyware, Trojans and other threats.

* Available in paid upgrade version
