

Bitdefender®

GravityZone Security for Endpoints

Bitdefender GravityZone is a resource-efficient security solution, which simultaneously provides high performance and protection, while delivering centralized management, easy deployment and the freedom to choose any combination of virtualization vendors, cloud providers, servers, desktops, laptops, and mobile devices.

Bitdefender GravityZone Security for Endpoints protects any number of laptops, desktops (Windows and Mac), embedded devices and servers by using number-one-ranked antimalware technology combined with two-way firewall, intrusion detection and application control capabilities.

Bitdefender provides the highly scalable Endpoint Security that businesses require for protection against malware and web threats.

The flexibility given by virtual container deployments allows Security for Endpoints to fit the needs of businesses from Small and Medium up to Large Enterprises and Service Providers (xSP), all can benefit from the modular and scalable GravityZone architecture.

Key benefits

Enhanced security with industry-awarded antimalware technologies

Awards from AV-Test, AV-Comparatives, and Virus Bulletin certify the performance of Bitdefender technologies and give administrators the peace of mind of having the best available solution.

Massively scalable architecture, high availability and performance

GravityZone Security for Endpoints is delivered within a virtual appliance with built-in redundancy to minimize risks and performance issues when managing large environments, and drastically reduces the manual effort and hardware needed to maintain an enterprise-wide security system.

Comprehensive feature set

GravityZone Security for Endpoints includes a fully featured two-way firewall with intrusion detection, antiphishing, web filtering, user and web control that blocks increasingly diverse threats from infecting end-user systems and server endpoints.

Simplified security management

GravityZone Security for Endpoints simplifies security operations, it reduces the time required to manage and maintain security operations and it further streamlines security management workflows.

Simple rollout

GravityZone Security for Endpoints provides a turnkey virtual container deployment, automatically uninstalling legacy endpoint clients, and integrating with Microsoft Active Directory thus accelerating rollout.

Features

- ▶ **A single AV solution across various corporate terminals**
Protects laptops, desktops (Windows and Mac) servers, tablets, and embedded devices like point of sale (POS) terminals, automated teller machines (ATMs) and self-service check-outs
- ▶ **Unobtrusive protection**
Requires no end-user interaction for deployment and ongoing operation
- ▶ **Low resource consumption**
Lightweight and not overloaded with unnecessary features, runs silently in the background without slowing-down the system
- ▶ **Two-way firewall with intrusion prevention**
Monitors network packages and blocks intrusion or hijack attempts when connecting to public networks
- ▶ **Web and application control**
Improves employee productivity by scheduling or restricting access to websites and applications that may be considered untrusted or improper in a workplace
- ▶ **Antiphishing and sensitive data protection**
Prevents loss of confidential data and protects against phishing, fraud, or malicious web content
- ▶ **Remote installation**
Easy to deploy remotely by leveraging Microsoft Active Directory or Network Discovery the solution can automatically detect and remove other incompatible security solutions at installation time
- ▶ **Active Virus Control**
Active Virus Control technology addresses all known security vulnerabilities and identifies new potential malware protecting from 0 day attacks

Supported Operating Systems

Security for Endpoints currently protects the following operating systems:

- ▶ Workstation operating systems:
 - ▶ Windows 7, 8, 8.1
 - ▶ Windows Vista (SP1), Windows XP (SP3)
 - ▶ Mac OS X Lion (10.7.x), Mountain Lion (10.8.x), Mavericks (10.9.x)
- ▶ Tablet and embedded operating systems:
 - ▶ Windows Embedded Standard, POSReady, 2009, 7
 - ▶ Windows Embedded Enterprise 7
 - ▶ Windows XP Embedded (SP 2), Tablet PC Edition
- ▶ Server operating systems:
 - ▶ Windows Server 2012, 2012 R2
 - ▶ Windows Small Business Server (SBS) 2008, 2011
 - ▶ Windows Server 2008, 2008 R2, Windows Small Business Server (SBS) 2003
 - ▶ Windows Server 2003 (SP 1), 2003 R2
 - ▶ Windows Home Server

Management platform (Control Center)

All Bitdefender GravityZone security services are managed by Control Center, delivered as a virtual appliance:

- ▶ OVA (compatible with VMware vSphere, View)
- ▶ XVA (compatible with Citrix XenServer, XenDesktop, VDI-in-a-Box)
- ▶ VHD (compatible with Microsoft Hyper-V)
- ▶ TAR.BZ2 archives for KVM, Oracle or RedHat Enterprise Virtualization

Support for other formats and virtualization platforms may be provided on request.
