

Bitdefender®

Enterprise Professional Services and Consulting

Top expertise at your service

An experienced team of security solutions engineers and malware researchers is always on call to respond to your needs. Bitdefender experts are ready to ensure protection for your IT equipment by providing the most adequate security solutions architecture. Your organization will benefit from the highest level of protection and performance.

Main benefits

- Top performance and maximum security for your organization
- Time-saving and efficient implementation of the security solution
- Quick return on investment in the security solution

Plan & Design

Bitdefender's experts will collaborate with you to identify the most adequate architecture in order to implement and operate a top security GravityZone virtualized environment. Our engineers specializing in security solutions will help you assess your organization's current system looking at your needs in terms of personnel, processes and technology. Key results include a summary of the system's current security status, requirements for hosting the security solution, essential recommendations for providing optimal scalable performance with risk minimization, a deployment plan and a system architecture model.

Deployment & Configuration

After the planning and design phase, our experts will install and configure the Bitdefender system so that it offers optimal response to the rigorous requirements of your business applications. Bitdefender's engineers will use their extended expertise attested in successful virtualization projects to implement the virtualization platform in a way that is perfectly adapted to your organization's needs.

On-site Product Trainings

On-site training ensures training on a personal level and provides your staff with practical experience in accordance with the role requirements for managing the security system. This way the security staff will be ready to provide efficient response to any threats concerning the system's integrity.

"I have never met such customized services in any provider"

Mike Turbutt, Dotter
