## antivirus for Mac

### Efficient Antimalware for Mac

Building on the valuable BitDefender experience in fighting computer threats, BitDefender Antivirus for Mac is an easy-to-use solution that will pro-actively secure your system from Mac viruses and will also detect and remove any type of malware targeting other operating systems.

### Key benefits

- ⦿ Protect your valuable files and documents from all Mac viruses
- ⦿ Don't pass viruses along to your friends working on Windows machines
- ⦿ Quickly check any file or the system critical areas
- ⦿ Lightweight – will not slow you down
- ⦿ Free 24/7 technical support

## Real-time Antivirus Protection

The virus shield automatically detects and blocks all known Mac viruses.

## Extended Detection

In addition to Mac viruses, BitDefender detects and removes any type of malware targeting other operating systems.

## Lightweight

Intelligent scanning and a small memory footprint lead to a low impact on your computer's speed.

## Intelligent Virus Scanner

Run a full virus check on your system or choose to scan only the critical areas for maximum efficiency.

## Scheduled scanning

The Scheduler lets you plan ahead and schedule full system/ drive scans in the off hours, when you are not using your computer.

## Quarantine Zone

Secures infected or suspected files and moves them to a safe location, pending forwarding to the BitDefender Antivirus Lab.

## Easy to use

Use the BitDefender dock icon to get access to the most common tasks or to drag&drop files on it for quick scanning.

## Always up-to-date

Fast automatic updates keep the product ready to react to any new threat.

## Innovative technology

The product is based on the award-winning BitDefender antivirus technologies.

## Professional Technical Support

Free technical support for the entire duration of the product license.

Protect your valuable files and documents from all Mac viruses

Don't spread viruses to your Windows friends

## System Requirements
