GravityZone for Service Providers (xSP)

ISP/Telco or Cloud Service Providers grow revenues and differentiate by hosting the Bitdefender GravityZone cloud console and offering leading protection for physical, virtual, and cloud workloads.

GROW REVENUES WITH LEADING SECURITY

Grow revenues by offering leading Bitdefender security to your customers and partners. It's simple to add new partner or customer accounts and protection is administered remotely from the web browser. Hosting the multi-tenant GravityZone Control Center cloud console gives you enhanced control and compliance with data regulations.

ONE SECURITY CONSOLE FOR PHYSICAL, VIRTUAL, AND PRIVATE, PUBLIC, OR HYBRID CLOUD

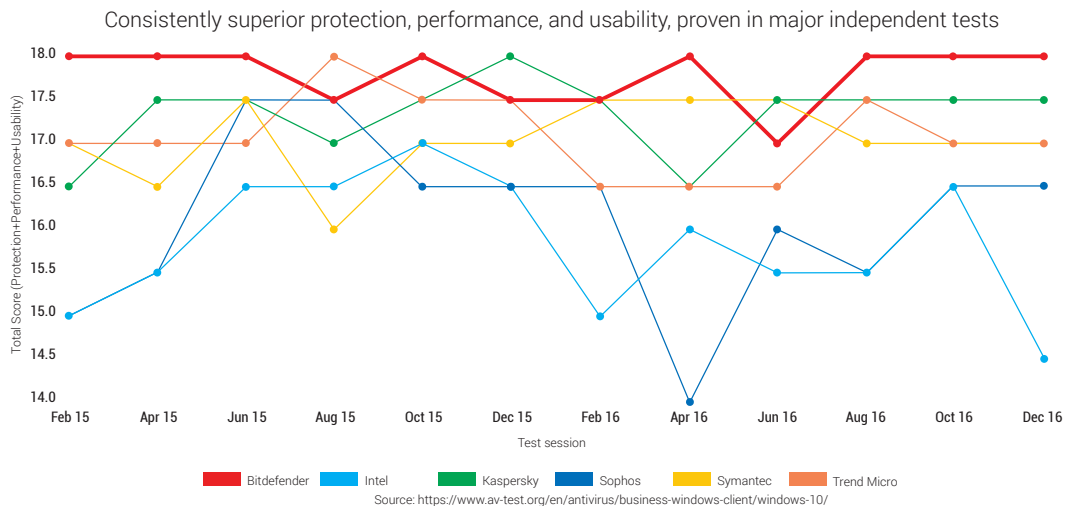

Ease customer's concerns regarding compliance and security as they transition to the cloud. Mitigate security risks and protect workloads wherever they are with security that is optimized for VMware, Citrix and any other hypervisor and is integrated with AWS.

SIMPLE MONTHLY LICENSING

Dynamic monthly billing based on usage allows you to pay only for the endpoints or mailboxes that were protected each month. The pay-per-use model streamlines operations eliminates the need to procure or change licenses for each individual customer or partner.

CONSISTENTLY RANKED FIRST FOR PROTECTION AND PERFORMANCE IN MAJOR INDEPENDENT TESTS

For more than 8 years Bitdefender has perfected machine learning algorithms, providing adaptive layered endpoint security that consistently ranks first for protection and performance. Bitdefender has the smallest footprint in virtual environments in LoginVSI tests, enabling the highest consolidation ratios. For physical endpoints, Bitdefender won the AV-Test Best Performance in the last 3 years.

ADAPTIVE SECURITY LAYERS:

Depending on your choice and the scan mode you are using (local, hybrid, centralized), you can activate some or all of the security layers and modules below to prevent even the most sophisticated threats:

Complete Antimalware and Antivirus – Bitdefender provides an advanced combination of Antivirus/Antimalware so you only need one security solution, mitigating security breaches, simplifying deployments and reducing expenses.

Machine Learning Threat Prevention – With more than 8 years of experience and 7 patents, Bitdefender has perfected Machine Learning algorithms to block elusive new threats with minimum false positives.

Advanced Anti-exploit – Bitdefender advanced anti-exploit protects not just against known exploits trying to hijack popular programs, but also against new ones, focusing on the attacks techniques.

Continuous Process Monitoring – Bitdefender Advanced Threat Control (ATC) continuously monitors running process for signs of malicious behavior and is able to detect and block attacks and

malware that eluded other security layers.

Web Filtering and Search Advisor – Bitdefender blocks phishing or malicious websites and displays search ratings signaling trusted and untrusted pages.

Application and Web User Control – To keep employees safe and boost productivity, access to the internet and to certain applications can be restricted or blocked.

Device Control – Threats are often introduced into the company via removable devices. Bitdefender device control allows you to choose which devices and device types will be allowed to run and which will be blocked or scanned automatically.

Exchange Security and Antispam – Consolidate endpoint and MS Exchange email security and antispam into one console with Bitdefender.

SIMPLIFIED MANAGEMENT

Fast deployment and easy scaling of GravityZone solution – GravityZone has been designed from the bottom up for cloud environments and the key components of the solution are delivered as virtual appliances, allowing for fast deployment, as well as scaling with redundancy, load balancing and HA.

Multi-tenant console and flexible user roles – The multi-tenant cloud architecture of the platform allows rapid creation of new partner or customer accounts. Each account can be assigned granular access and view rights depending on the company or groups.

Professional Services and Premium Support – Professional Services delivered remote by Bitdefender technicians help you roll out the solution and ensure you start with the best configuration. Premium Support is available to support your needs and ensure you can provide the best service to your customers.
