Bitdefender®

Cloud Security for MSPs

Powered by machine learning algorithms perfected in years, Bitdefender #1 ranked security is now available as a complete MSP security suite managed from a single multitenant console with simple monthly licensing.

Consistently superior protection, performance, and usability, proven in major independent tests

Real-World Protection Test

AV-Comparatives, March, 2017*

NEXT-GEN SECURITY THAT'S CONSISTENTLY RANKED #1

For more than 8 years Bitdefender has perfected machine learning algorithms, providing adaptive layered endpoint security that consistently ranks first for protection and performance. Bitdefender's combined antivirus/antimalware and endpoint security technologies are highly efficient even against sophisticated ransomware or 0-day attacks thanks to its layered defenses which include: Machine Learning, Advanced Anti-Exploit, Continuous Process Monitoring, Content and Device Control or Web Filtering.

POWERFUL BUT LIGHT

Achieving a high level of protection is key for security solutions but it's also very important to avoid slowing down machines or generating false positives that can cause headaches for customers and support engineers. Bitdefender leads rankings not only for detection but also for performance, demonstrating the smallest possible impact on protected systems out of all tested solutions and winning the AV-Test Best Performance Award in 2014, 2015, and 2016.

SIMPLIFIED DEPLOYMENT

No security server is ever needed, reducing expense and hassle. In addition, Bitdefender Cloud Security for MSPs, automatically uninstalls competitive endpoint solutions and provides a mass remote deployment mechanisms for fast and simple rollout.

SIMPLE MONTHLY LICENSING

Dynamic monthly billing allows you to pay for just the endpoints or mailboxes that you have active each month, letting you manage expenses and cash flow. If you prefer, a yearly license can also be provided.

CONNECTWISE INTEGRATIONS

Bitdefender's Cloud Security for MSPs connects the Bitdefender Control Center to a ConnectWise account simplifying your ticketing and billing. The integration includes:

- Setting up the ticketing service for different types of security events
- Setting up the billing service
- Importing ConnectWise companies to Bitdefender Control Center

**ADAPTIVE SECURITY LAYERS (INCLUDED IN THE MSP ENDPOINT SECURITY OFFER WITHOUT ADDITIONAL CHARGES):**

You can activate some or all of the security layers and modules below to prevent even the most sophisticated threats:

Complete Antimalware and Antivirus – Bitdefender provides an advanced combination of Antivirus/Antimalware so you only need one security solution, mitigating security breaches, simplifying deployments and reducing expenses.

Machine Learning Threat Prevention – With more than 8 years of experience and 7 patents, Bitdefender has perfected Machine Learning algorithms to block elusive new threats with minimum false positives.

Advanced Anti-exploit – Bitdefender advanced anti-exploit not only provides protection from known exploits, trying to hijack popular programs, but also against new ones, by focusing on attack techniques.

Continuous Process Monitoring – Bitdefender Advanced Threat Control (ATC) continuously monitors running process for signs

of malicious behavior and is able to detect and block attacks and malware that eluded other security layers.

Web Filtering and Search Advisor – Bitdefender blocks phishing or malicious websites and displays search ratings signaling trusted and untrusted pages.

Content Control – Keep employees safe and boost productivity with application control and URL blocking by category or schedule and using a configurable block/allow exclusions table.

Device Control – Threats are often introduced into the company via removable devices. Bitdefender device control allows you to choose which devices and device types will be allowed to run and which will be blocked or scanned automatically.

OPTIONAL BITDEFENDER MSP SERVICES MANAGED FROM THE SAME CONSOLE (BILLED SEPARATELY):

Exchange Security and Antispam - Consolidate endpoint and MS Exchange email security and antispam into one console with Bitdefender. The optional billable service available for Bitdefender MSP partners includes email antimalware with behavioral detection, antiphishing, attachment and content filtering, and antispam helping you keep customers productive and safe from email threats.

NEW Full Disk Encryption - The Bitdefender console is now the one stop shop, not only for protecting your customers' endpoints from malicious software or targeted attacks but also for compliance reporting and encryption key recovery. Prevent compromise of confidential data when laptops are stolen and help customers demonstrate compliance with HIPAA, GDPR, or other regulations using the new optional service now available with monthly billing for MSPs. Bitdefender Full Disk Encryption leverages proven native mechanism provided by Windows (BitLocker) and Mac (FileVault) to ensure compatibility and performance. It's easy to manage or restore keys from the console as well as generate encryption reports.

SIMPLIFIED MANAGEMENT

Multi-tenant console and flexible roles – Administer all customers in a state-of-the-art cloud management console using granular security policies and role-based user access rights.

Granular policies, reports and alerts – The multi-tenant console enables MSPs to apply different policies for companies or specific groups. A quick status is available through the dashboard or predefined reports.

Optimized Bandwidth Consumption – With the security relay mechanism, external traffic is minimized by using the local network to distribute updates or deploy new clients.

Simple usage-based licensing – We invoice MSP partners based on the total number of computers protected each month, maximizing your cash flow and making it fast and efficient for you to provision new endpoints on the fly.
