

Bitdefender®

Security for MSPs

Integrated with Kaseya

The #1 ranked antimalware security is now available for MSPs using Kaseya with full integration into the Kaseya console and simple pay-per-use monthly licensing.

Stop Threats and Reduce Costs with the #1 Ranked Corporate Security

Security breaches are one of the best way to lose customers. In addition, cleaning up after a malware incident costs you time and drives up your operating expense. Bitdefender consistently outperforms all other vendors in independent corporate solution tests demonstrating superior protection, performance, and usability.

Streamline Security Management with Full Kaseya Integration

While many AV vendors tout integration into the Kaseya console, Bitdefender is among the few solutions to be fully integrated. By using a single console for all security tasks you save time compared to the alternative which require you to also use a vendor console.

Simple Pay-per-use Licensing

Reduce the time spent provisioning accounts and managing licenses. With the Bitdefender monthly licensing you use a single key for all customers and you are invoiced at the end of the month for the total number of protected endpoints.

Comprehensive Product Line Up

When you become a Bitdefender partner, you gain access to Bitdefender's complete product line including Mobile Security and the most advanced set of virtualization (for VMware, Citrix, Hyper V) and cloud security solutions.

Easy to Deploy

With the click of a button on your Kaseya console, Bitdefender will identify all endpoints at your customers sites and begin the install process which includes the removal of the old antivirus software.

The Support You Need

Bitdefender's Partner Program provides you with aggressive pricing, training, NFR software, along with marketing and sales support. We know you need a partner that you can count on, so we've installed a dedicated MSP HOTLINE giving you specialized phone support 24/7.

Best Corporate Security
Corporate Products - January/February 2015 - av-test.org

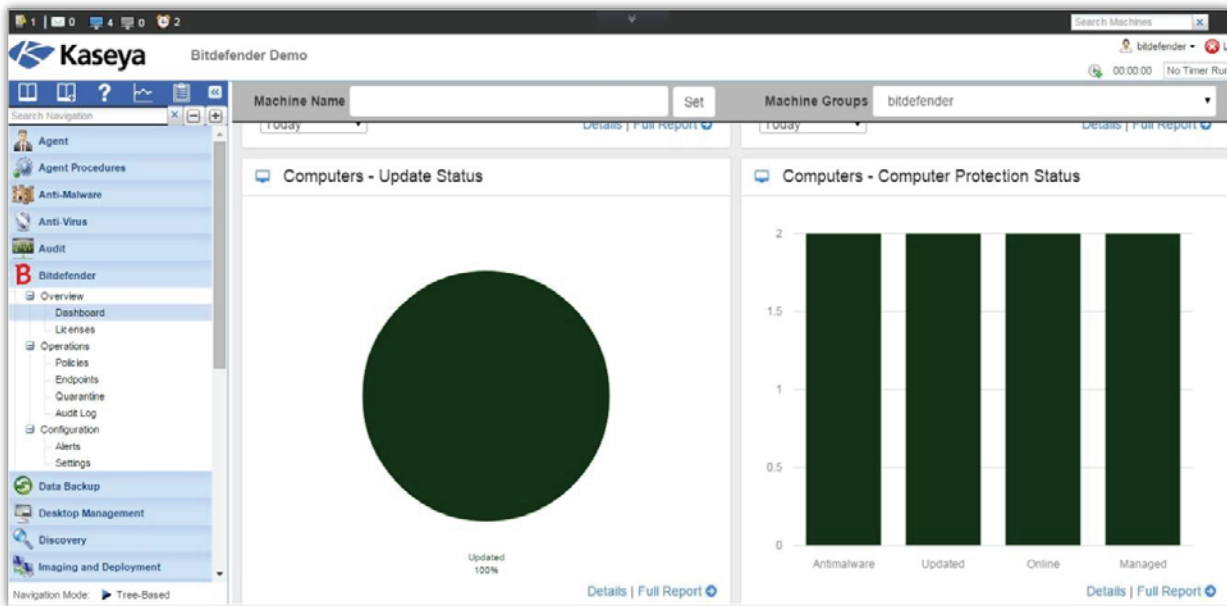

"We decided to work with Bitdefender for a number of reasons. The products easily integrate in our Microsoft environment, they detect unprotected endpoints and clean up malware instantly, and the centralized management makes our job very easy."

Rob Bosch, President, iPremise

FEATURES

- Bitdefender #1 ranked antivirus and antimalware
- Protection for Windows systems, both desktops and server endpoints
- Remote deployment simple uninstall of competitive solutions
- Monthly and yearly licenses available
- Granular policies, reports, and alerts
