

Bitdefender® GravityZone

Defeat threats. Drive performance. Deliver control.

Bitdefender GravityZone is a resource-efficient security solution, which simultaneously provides high performance and protection, while delivering centralized management, easy deployment and the freedom to choose any combination of virtualization vendors, cloud providers and devices.

Defeat Threats

- ▶ GravityZone delivers top protection and compliance for virtualization and cloud environments.
- ▶ #1 rated Bitdefender technologies provide the best protection, and best removal-performance and speed.
- ▶ GravityZone scalable architecture provides resilient multilayer protection.

Drive Performance

- ▶ Through testing with Login VSI, GravityZone showed a 30% increase in VDI density.
- ▶ Customers report lower operational costs and significant savings in time and effort, based on GravityZone management tools and simple deployment.
- ▶ GravityZone is elastic, which allows customers to spin up or scale down virtual appliances, physical machines and devices, on demand.

Deliver Control

- ▶ GravityZone is hypervisor-agnostic and delivered as a virtual appliance for quick and easy deployment across any combination of virtualization platforms and devices.
- ▶ Unlike others, GravityZone provides a unified management console across all security services on physical, virtualized and mobile endpoints.
- ▶ GravityZone is integrated with VMware vCenter, Citrix XenServer and Microsoft Active Directory.

Enterprises choose Bitdefender for the highest level of security innovation and performance capabilities in virtualized, physical, mobile and cloud environments.

“The whole point of virtualizing is to get more out of your machines and save costs – Bitdefender allows you to get even MORE out of your virtualized environments.”

Mike Kupfer, CEO, Black Diamond Solutions (Bitdefender Partner)

“During the proof-of-concept stage, our customers noticed an improvement in performance, which helped us see that Bitdefender was the clear choice.”

Jose Uribe, COO, Webhosting.net (Bitdefender Customer)

“It became clear from a long term planning perspective that traditional security solutions just would not work. We knew we needed to find a security solution built for virtualized environments.”

Mark Breaux, Information Technology Officer, Citizens Savings and Loan (Bitdefender Customer)

BUILT FOR SERVICE PROVIDERS

Bitdefender GravityZone integrates with automated ordering, provisioning and billing systems.

“Based on our business model and our need for scalability, we needed a security solution that we could host entirely and something that would give us flexible licensing to pass along to our clients”

Christopher Fox, Director of Technology, Ideal Integrations (Bitdefender Partner)

Bitdefender GravityZone Key Features

- ▶ **Hypervisor-agnostic security.** Protects Windows and Linux virtual machines on all existing hypervisors
- ▶ **Innovative modular design.** Functional modules built as hardened Linux-based virtual appliances provide high protection, performance and resilience through centralized scanning and load balancing
- ▶ **Integrated with leading virtualization and cloud vendors.** Integrates with VMware vCenter, vShield, Citrix XenServer, Microsoft Active Directory, Amazon Web Services EC2
- ▶ **Environment aware security agent.** One security agent recognizes the endpoint type and self-configures with optimal features that recognize virtual and physical endpoints
- ▶ **Integrated with VMware vShield.** Optional “agentless” security through integration with the latest VMware APIs
- ▶ **Linux virtual machines protection.** Full protection and removal capabilities including on-access real-time protection for Linux virtual machines, including vShield implementations
- ▶ **Monthly billing support for Service Providers.** Monthly licensing and integration with existing PSA software that matches provider business models
- ▶ **De-duplicating scanning processes through multi-level caching.** To minimize resources usage, known objects are not rescanned across an environment
- ▶ **Optimized Scanning.** Scanning processes are reduced up to 90% by focusing on areas that are susceptible to hosting threats
- ▶ **Unified web console for all security services.** Control Center web console manages virtual machines, physical endpoints, and mobile devices. It integrates with vCenter, XenServer, and Active Directory to synchronize inventories and manage machines and devices
- ▶ **Streamlined deployment tools.** vApp like virtual appliances and self-configuring security agent optimized for inclusion in VM templates

WIDE VIRTUALIZATION COVERAGE THROUGH TECHNOLOGY PARTNERSHIPS

VMware vSphere & ESXi
 VMware vCenter Server
 VMware vShield Manager
 VMware vShield Endpoint
 VMware vCNS
 VMware Tools
 VMware View

Citrix XenDesktop
 Citrix Xen Hypervisor
 Citrix XenServer
 Citrix VDI-in-a-Box

Microsoft

Microsoft Hyper-V Hypervisor
 Microsoft Hyper-V Server

Linux

Red Hat Enterprise
 Red Hat KVM Hypervisor

Oracle

Oracle VM

OPERATING SYSTEMS COVERAGE

Windows, Windows Server
 Linux: Red Hat Enterprise Linux, CentOS, Ubuntu, SUSE Linux Enterprise Server, OpenSUSE, Fedora
 Mac OS X
 Oracle Solaris

Mobile:

iOS Apple iPhone and iPad
 Google Android

Bitdefender delivers security technology in more than 100 countries through a cutting-edge network of value-added alliances, distributors and reseller partners. Since 2001, Bitdefender has consistently produced market-leading technologies for businesses and consumers and is one of the top security providers in virtualization and cloud technologies. Bitdefender has matched its award-winning technologies with sales alliances and partnerships and has strengthened its global market position through strategic alliances with some of the world's leading virtualization and cloud technology providers.
